

# REDDING DIES

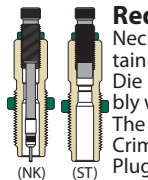

## Redding Full Length 2 Die Set

Full Length Die sets for bottleneck cases contain two dies. The Full Length (FL) Resizing Die contains a Decapping Rod Assembly with a Neck Expander (Size Button). The Seating Die (ST) includes built-in Crimp Ring and the proper Seating Plug.

## Redding Deluxe 3 Die Set

Deluxe Die sets for bottleneck cases contain three dies. They are a special packaging of their Full Length Die, Seating Die with the addition of a Neck (NK) Sizing Die.

## Redding Neck 2 Die Set

Neck Die sets for bottleneck cases contain two dies. The Neck (NK) Resizing Die contains a Decapping Rod Assembly with a Neck Expander (Size Button). The Seating Die (ST) includes built-in Crimp Ring and the proper Seating Plug.

## Redding Profile Crimp Dies

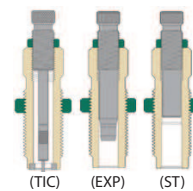

These handgun cartridge crimp dies were designed for those who want the best possible crimp. Profile crimp dies provide a tighter, more uniform roll type crimp, and requires the bullet to be seated to the correct depth in a previous operation.

These dies are not for cartridges that headspace on the case mouth.

## Redding Bullet Seating Micrometers

A new Bullet Seating Micrometer has now been created by Redding for use with all standard seating dies using 1/2"-20 threads. These Bullet Seating Micrometers are available for both traditional (STD) bullet shapes as well as the new VLD bullets. They provide a direct replacement for the original seat plugs and can easily be changed from one die to another. **Not for use with their Competition Seating Dies.**

## Redding Die Sets for Straight Wall Cases

Die sets for straight wall cases contain three dies. This is necessary because it is not possible to full length resize straight wall cases and expand the neck for proper bullet fit in one operation.

The Full Length Resizing Die contains a Decapping Rod Assembly. The Expander Die contains a Neck Expanding Plug. The Seating Die includes a Bullet Guide, built-in Crimp Ring and the proper Seating Plug.

## Redding Trim Dies

Redding trim dies allow you to file trim your cases without unnecessary resizing. Other manufacturers use sizing die dimensions, forcing you to full length resize when trimming. For case forming and necking brass down from another caliber, Redding Trim Dies can be the perfect intermediate step before full length resizing. **Pistol Trim Dies require Extended Shell Holders (Sold separately).**

## Redding Taper Crimp Rifle Dies

Designed for rifle cartridges which headspace on the case mouth where conventional roll crimping is undesirable.

## Redding Rifle Die Sets

Redding guarantees their dies to produce ammunition that will properly fit any standard (SAMMI) chamber, regardless of action type. To maintain tolerances and guarantee that your dies will last a lifetime, they are heat treated in atmospherically controlled furnaces. All dies are hand polished for smooth, flawless functioning, inspected, and are ultrasonically cleaned before packaging. The die box is a handy cartridge loading block and storage package. Inside is a spare decapping pin, hex wrench, and a place for your Shell Holder! All Redding dies use the industry standard 7/8"-14 threaded bodies. \*Shell Holder not included in these Die Sets.

## Redding Competition Pro Series Die Sets

Competition Pro (Progressive) Series three (3) die sets are designed for use in progressive reloading machines by reloaders seeking the best possible bullet alignment. All progressive die sets are supplied with a Profile Die (or Taper Crimp Die if the cartridge headspaces on the case mouth) because the best possible crimp is attained after the bullet is seated with the included Competition Bullet Seating Die. An Expander Die is not included in these sets as the most popular progressive machines expand the case mouth at the powder drop station. Since Carbide Sizing Dies are not available for certain cartridges, these die sets are also available with Steel Sizing Dies. All Pro Series Die Sets are designed with a special large radius at the mouth of the seating and crimping dies for easy case entry.

# REDDING DIES

## Redding Titanium Carbide Handgun Die Sets

Titanium carbide differs considerably from other carbides, and is the ideal material for resizing cartridge cases. Titanium Carbide has the highest hardness of any readily available carbide. The difference is in the microstructure. Viewed under a microscope it appears smooth and rounded, which presents a slippery non-galling surface, ideal for lubeless resizing of cartridges. Two types of die sets are available. The conventional Titanium Carbide three (3) die set includes the Titanium Carbide Sizing Die, Expander Die and Bullet Seating Die with built-in crimp. The "Pro (progressive) Series 3-Die Set" is a special three (3) die set designed for use in progressive machines. An expander die is not included in these sets as the most popular progressive machines expand the case mouth at the powder drop station.

Progressive die sets are supplied with a Profile Crimp Die (or Taper Crimp Die if the cartridge headspace on the case mouth) because the best possible crimp is attained after the bullet is seated. All Pro Series Die Sets are designed with a special large radius at the mouth of the seating and crimping dies for easy case entry.

## Redding Handgun Competition Bullet Seating Dies

This die features a very unique way to bias the bullet into alignment with the cartridge case. The precision fitting, spring loaded seating stem is allowed to move down into the chamber of the die, aligning the bullet and cartridge case well in advance of bullet seating. Precise alignment is then maintained as the bullet and cartridge case move upward until seating is accomplished. This patented system assures you of the best possible bullet alignment.

## Redding Micro-Adjustable Crimp Dies

Redding's new Micro-Adjustable Taper Crimp Dies are top adjustment to simplify making precise adjustments. Variations in case length and wall thickness both adversely affect proper adjustment. Traditional Taper Crimp Die adjustment is both time consuming and imprecise due to the coarse 7/8" - 14 pitch die threads and the need to re-position the lock ring, this is especially important to users of progressive reloading presses with tight space constraints. The new Redding Micro-Adjustable Taper Crimp Dies have a knurled micrometer type barrel situated on the top of the die for easy access and provides approximately +/- .100" of "on-the-fly" adjustment after initial setup. Versatility is enhanced by the internal crimping sleeve which can be reversed to accommodate two different cartridges having closely related body diameters. An example is the 38 Super and the 9mm family of cartridges.

## Redding Dual Ring Carbide Sizing Die Sets

Redding has incorporated two carbide rings within one sizing die. The upper ring is positioned to size only the bullet retention portion of the case while the other is located to properly size the case body without overworking the brass. Sized cases will not only look and function better but brass life will increase.

**Dual Ring Carbide Die Set Includes:** Carbide Dual Ring Sizing Die, Expander Die and Seating Die.

**Dual Ring Pro-Series Die Set Includes:** Carbide Dual Ring Sizing Die, Pro Seating Die and Crimp Die.

**Dual Ring Competition Pro-Series Die Set Includes:** Carbide Dual Ring Sizing Die, Competition Seating Die and Crimp Die.

## Redding Die Spacer Kit

For use with combination die sets and all 7/8"-14 reloading dies to quickly compensate for case length or make a no-crimp adjustment without the need to move the lock rings. The kit includes three spacers: No-crimp or partial resizing, 44 Spl/44 Mag spacer, 38 Spl/357 Mag spacer.

## Redding G-RX Push Thru Base Sizing Dies

The new G-RX Carbide push thru Base Sizing Die is designed to restore fired cases from 40 S&W auto-loading pistols that exhibit a bulge near the base without the need for case lube. By passing the case completely through the new G-RX Carbide Die, the bulge is removed and the case may be returned to service.

RE96150 ..... G-RX Carbide Sizing Die\* ..... \$93.29

 RE96020 ..... Large 32 oz. HDPE Bottle ..... \$7.79  
 \* Includes Shell Holder Pushrod

# LEE DIES

## Lee Carbide Factory Crimp Die

A Carbide Sizer sizes the cartridge while being crimped so every round will positively chamber freely with factory like dependability. The adjusting screw quickly and easily sets the desired amount of crimp. It is impossible to buckle the case as with a conventional bullet seating die. Trim length is not critical so this extra operation takes less time than it would if cases were trimmed and chamfered. Revolver dies roll crimp with no limit as to the amount. A perfect taper crimp is applied to auto-loader rounds. A firm crimp is essential for dependable and accurate ammunition - it eliminates the problems of poor ignition of slow burning magnum powders.

## Lee Taper Crimp Die

The Lee Taper Crimp Die is hardened steel designed to overcome crimp problems caused by poor die design. These dies offer little or no advantage when used with 1986 or newer Lee Dies as the crimp angle is already a modified taper crimp. Jacketed bullets must have a crimp groove.

## Lee Universal Case Expanding Die

Gently flares the case mouth to accept cast bullets without shaving. Works great to prevent damaging the moly and low friction coatings found on today's high performance jacketed bullets. Includes neck plugs for .22 cal through .45 cal. Works on everything from the 22 Hornet to the largest Ultra Mag. Costs so little and works so well you can't afford to be without one.

LE90798 ..... \$14.99

## Lee Die Lock Ring

Finger tighten-set and forget, they never move. Just be sure to always loosen your dies by turning the ring, not the die. These have become so popular that Lee sells thousands of lock rings to people who want to update other brands.

LE90534 ..... \$3.99

## Lee Breech Lock Quick Change Bushings

Breech Lock bushings fit all Lee Breech Lock Presses. Allows instant, accurate die changes. Perfect with Lee Lock Rings. 2 pack.

LE90600 ..... \$7.99

## Lee Decapper Punch & Base

Easily removes crimped in primers from military cases. Guaranteed unbreakable.

LE90103 ..... 22 Caliber ..... \$8.99  
LE90102 ..... 30 Caliber ..... \$8.99

## Lee RGB 2-Die Set

Lee guarantees these dies to be better than any other brand. If for any reason you're not 100% satisfied - just return them to the factory with your sales slip and pay the difference of what you paid and the manufacturer's catalog list price of the dies you want. These dies are a Really Great Buy. They cost less, because like other die makers, Lee left out \$20 worth of extras which are included in their Pacesetter Dies. Set includes Full Length Sizing Die and Bullet Seater.

## Lee Collet Neck Size 2-Die Set

There is no loading system that will load more accurate ammunition than Lee Collet Dies. A Collet squeezes the case neck against a precision mandrel for a perfect bullet fit with minimum run-out. No case lube is needed. Cases last ten times longer, so the savings on only 35 cases will pay for the dies. Maximum accuracy is usually achieved by seating the bullet out far enough to touch or almost touch the rifling. This provides the shot start pressure normally supplied by the crimp. That's why a Dead Length Bullet Seater is included to complete the most accurate reloading system ever made. These dies size only the neck to preserve the perfect fit of fire forming. Only reload cases that have been fired in your guns. Sets includes Collet Neck Sizing Die, Dead Length Bullet Seating Die, Shell Holder, Powder Measure, Charge Table and Storage Box.

## Lee Carbide 3-Die Set

Lee uses a solid carbide insert, ground to a special contour that does not leave the objectional belt mark on the case, common to ordinary carbide dies. With a carbide sizer, no case lube is needed, and you don't even have to clean your cases. Taper Crimp Dies are used to correct the problems caused by the improper expanding plug design or adjustment. They distort the bullet shank and reduce accuracy. Because the Lee Expander flares the minimum amount, consistent with easy bullet insertion, all of the flare is removed with the Bullet Seating Die, thus eliminating the need for a Taper Crimp Die. Set includes Carbide Sizer Die, Powder Through Expander Die, and Bullet Seater Die. Also comes with the appropriate Shell Holder, Powder Dipper, Load Data Sheet, Die Box and Decapping Unit.

## Lee Deluxe Pistol Carbide 4-Die Set

Combines the world's most popular carbide three-die set with the Lee Factory Crimp Die at a great price. No other die set at any price produces more reliable or accurate ammo. By separating the seating and crimping operation, you will benefit by greatly simplified adjustment. More importantly, the Carbide Factory Crimp Die post sizes your case, assuring that any round that passes through the die will chamber properly in your gun. Set includes Carbide Factory Crimp Die, Carbide Full Length Sizing Die with Decapping Unit, Powder Through Expanding Die, and Bullet Seat and Feed Die. Also comes with the appropriate Shell Holder, Powder Dipper, Load Data Sheet and Die Box.

## Lee Pacesetter 3-Die Set

Lee Pacesetter 3-Die Sets includes the exclusive Lee Factory Crimp Die to produce factory-like ammunition with improved utility and accuracy. The die set also includes a Full Length Sizing Die and a conventional Bullet Seater. These dies are your best buy. They also include a Shell Holder, Powder Dipper, Load Data and are packed in the nicest storage box ever designed. These are the most copied dies in the world. Each and every die comes with a written lifetime warranty, 2-year guarantee and guarantee of accuracy or your money back!

## Lee Pacesetter 2-Die Set

The same features and quality of Lee standard dies, but do not include a Lee Factory Crimp Die. Includes Shell Holder and Powder Measure.

## Lee Ultimate Rifle 4-Die Set

Choose this die set for maximum versatility. The set features a Full Length-Resizing Die to return brass to factory new dimensions, perfect for reloading brass fired in other guns. The Collet Neck Sizing Die is used on your fire formed brass giving you best possible accuracy. No case lube required and cases last almost forever. The easy adjust Dead Length Bullet Seating Die foolproofs the bullet seating adjustment, and assures perfect seating depth every time. The Factory Crimp Die provides a secure crimp on bullets with or without a crimp groove. In most cases it helps accuracy by providing a uniform higher start pressure and gives the finished cartridge factory like accuracy and dependability. The set is complete, with Shell Holder, Powder Measure and famous Lee Load Data featuring all common brands of powder organized in a easy to read logical format. Set includes Full Length Resizing Die, Collet Neck Sizing Die, Easy Adjust Dead Length Bullet Seating Die, Factory Crimp Die, Shell Holder, Powder Measure, Charge Table and Storage Box.

## Lee Limited Production Pacesetter 2 Die Set

The price is slightly higher because production quantities are lower. You'll find no better die at any price. Half the price of competitive dies and theirs don't include load data which is priceless on odd or obsolete calibers. Sets includes a Full Length Sizing Die and a conventional Bullet Seater Die, proper Shell Holder, Fitted Box, Powder Measure and Charge Table at no additional cost!

## Lee Limited Production Pacesetter 3-Die Set

The same features and quality of Lee standard dies, but includes a Lee Factory Crimp Die.

## Lee Steel Pistol 3-Die Set

Same features as Lee's Premium Carbide Sets, except the case must be lubricated. Set includes Sizer Die, Powder Through Expander Die, and Bullet Seater Die. Also comes with the appropriate Shell Holder, Powder Dipper, Load Data Sheet and Die Box.

**Lee Long Charging Die**

This die is used to charge small capacity rifle cases using the Auto-Disk Powder Measure. Works with cases 1.760 to 2.620 inches long (223 Rem to 300 Win Mag). It works the same as the pistol powder through expanding dies except it doesn't expand the case mouth. Rifle case expansion is normally done in the sizing die.  
**LE90194** ..... \$12.99

**Lee Short Charging Die**

Lee Short Charging Die is for use with the Lee Auto-Disk, Pro Auto-Disk and Auto-Drum Powder Measure. Works with cases .860 to 1.760 inches long (22 Hornet to 223 Rem), and bullet diameter .223 and larger due to powder bridging. Works the same as the pistol powder through expanding die, except it doesn't expand the case mouth. Rifle case expansion is done in the sizing die.  
**LE90668** ..... \$12.99

**Lee Charging Die Kit**

Includes both the Short and Long Charging Dies.  
**LE90995** ..... \$19.99

**Lee Universal Press Shell Holder Set**

Eleven of the most popular sizes fit over 115 different cartridges. The chart is included with each Shell Holder set. Includes Shell Holders: #1, 2, 3, 4, 5, 7, 8, 9, 10, 11, 19.  
**LE90197** ..... \$35.99

**Lee Auto Prime Shell Holder Set**

Eleven of the most popular sizes fit over 115 different cartridges. Includes Shell Holders: #1, 2, 3, 4, 5, 7, 8, 9, 10, 11, 19. Includes storage box.  
**LE90198** ..... 11 Shell Holder Set ..... \$15.99  
**LE90196** . Extra Shell Holder Storage Box .. \$4.99

**Lee Powder Through Expanding Die**

Only Lee Dies permit charging the case while expanding the case mouth. Every Lee 3-Die Set includes this Powder Through Expanding Die at no extra cost. The powder funnel adapter can be replaced with a Lee Auto-Disk Powder Measure for fully automatic powder charging while the case mouth is being expanded.

**Lee Auto-Disk Riser**

Allows use of other brands of dies that have extended adjusting screws and provides clearance for the Lee Safety Prime.  
**LE90041** ..... \$7.99

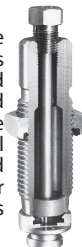

**Lee Factory Crimp Die**

The Lee Factory Crimp Die crimps the bullet in place more firmly than any other tool. It is impossible to buckle the case as with regular roll crimp dies. Tests demonstrate that even bullets which have no cannelure will shoot more accurately if crimped in place with the Lee Factory Crimp Die. A firm crimp improves accuracy because pressure must build to a higher level before the bullet begins to move. This higher start pressure insures a more uniform pressure curve and less velocity variation.

**Lee Carbide Sizing Die**

All Lee straight sided pistol dies have tungsten carbide sizer rings. Carbide is so hard that it can only be ground and polished with diamond wheels. This hard diamond polished surface eliminates the need for case lubrication and they will never wear out. Exclusive contour grind sizes closer to the rim than any other brand. Available for select Pistol Calibers only.

**Lee Die Storage Rack**

Sturdy steel rack with fasteners designed for the Lee Reloading stand. Conveniently holds your dies, especially helpful when loading small batches of ammo with frequent die changes.  
**LE90680** ..... \$11.99

**Lee Die Storage Box**

Round Die Box - Lets you store dies installed in a 3 or 4-hole turret.  
 Flat Die Box - Perfect storage for dies from a tough, durable plastic. Holds dies with Breech Lock Quick Change insert installed. Die sets not included.  
**LE90535** ..... Round Die Box ..... \$4.99  
**LE90791** ..... Flat 3-Die Box ..... \$3.99  
**LE90422** ..... Flat 4-Die Box ..... \$5.49

# L.E. WILSON DIES

Tools **WILSON** Gages  
FOR ACCURATE UNIFORM HANDLOADS

## L.E. Wilson Rifle Case Holder

The Case Holder holds the case for trimming, primer pocket reaming, neck reaming and deburring.

**Fired Case Holders** - Neck Sized only or if you are forming wildcat calibers and want to trim non-full length sized brass

**New Case Holders** - Full length sized cases or new factory brass

**Standard Case Holders** - These will work for all cases new or fired

## L.E. Wilson Stainless Steel Neck Sizing Die

Designed so the user can control and/or change the amount of neck sizing the cartridge case receives. Uses interchangeable sizing bushings that size the outside of the case neck. The conventional expander is eliminated, improving concentricity and prolonging brass life. The die is used with an Arbor Press. Sizes the neck to 3/16" from the mouth end, a practice many shooters prefer. Dies include a decapping rod. **Neck sizing die requires neck size bushing.**

## L.E. Wilson Punch & Base

The Punch and Base decaps the primer from the case while providing a stable base. Bases are case hardened for wear resistance. Available for most calibers. Punch Base and Neck Die Punch available at PrecisionReloading.com

## L.E. Wilson Neck Die Bushing

The Neck Die Bushing fits in the Neck Die and sizes the case neck to grip the bullet. To figure out what size to order...Measure the diameter of a loaded round where the bullet sits in the neck (Ex. .268). Now subtract .002 to .003 from that number.

.268-.002 = .266 Bushing.  
**WILNBXXX (Specify Size)** ..... \$15.99

## L.E. Wilson Rifle Case Length Gage

One-piece, non adjustable cylinder-type gage with milled surfaces on one end for checking minimum and maximum overall length of rifle and pistol cases having no shoulder.

**WILCLGM1CB** ..... 30 M1 Carbine ..... \$18.99

## L.E. Wilson Stainless Steel Bullet Seater with Micrometer Adjustment

The most accurate and easiest to use straight line dies on the market. The stainless seaters have a built in micrometer seating depth adjustment feature with an easy to read scale in .001 graduations. Major seating adjustments can be made with the 3/8"-24 threads in the cap, select calibers available.

## L.E. Wilson Chamber Type Bullet Seater

A favorite among benchrest shooters. A chamber type bullet seater positively controls both bullet and cartridge case alignment. The case and bullet are completely captured by the die prior to the bullet being pushed straight into the case by a close fitting seating stem. This style of bullet seater works more accurately than a conventional (7/8"-14) bullet seating die. Seating depth adjustments are made by turning the screw inside the cap (3/8" - 24 threads). This is one of the most accurate bullet seaters ever made.

## L.E. Wilson Bushing Type Full Length Sizing Die

The NEW Wilson Bushing Type Full Length Sizing Die. This die will allow you to size the case neck to your desired neck tension along with sizing down the rest of the case body at the same time. Die includes an adjustable depth decapping rod. Extra Decapping Punch included, does not contain an expander. Made of High Quality Heat Treated Steel. Bushing sold separately.

## L.E. Wilson Regular Style Case Gage

One piece gage that will check overall length to indicate the need for trimming, datum to head length to assure correct headspace and to prevent over sizing. Available for most popular rimless cases. **Note:** Does not measure body diameters. This gage is intended to be used with fired cases to determine a basis for full length sizing and trimming.

## L.E. Wilson Case Gage Depth Micrometer

Every reloader should know exactly how much your Full Length Sizing Die is pushing back the shoulder. With the NEW Case Gage Depth Micrometer you can do just that! It has never been easier to measure your cases headspace before and after sizing. The Depth Mic allows you to slip the micrometer perfectly over the top of the gage with your case inserted into the gage and take a measurement. Graduations of .001 comes with a Gage Block. One size works for all L.E. Wilson Gages.

**WILCGMIC** ..... \$83.99

## L.E. Wilson Adjustable Style Case Gage

For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. These gages, which can be adjusted to be used with individual rifles of the same caliber, will enable the handloader to control the amount of resizing simply by measuring a fired case. Overall length can also be checked with these gages.

## L.E. Wilson Q-Type Case Holder

The Q-Type Case Holder holds the case with an easy to use cross pin. Use this type whenever possible because the regular pistol case holders require you to tap the pistol case in, which is more difficult than the rifle cases because of the lack of a body taper. View Reference chart.

## L.E. Wilson Pistol Max Case Gage

Max Gages measure case length, loaded round length and max chamber diameters. Select calibers available. View Reference chart.

## L.E. Wilson Hardened Pistol Holders

All these cases have practically no body taper and require a special type holder, which is constructed very much like a neck sizing die. Cases can't be "bumped" in and out of these holders like most rifle cases but must be forced in with a light arbor press or mallet and must be driven or pushed out. These holders are made longer than the cases to be trimmed so that cases may be forced clear in without damage to case mouth. Holders are counter-bored at mouth end for cutter clearance. Users will find the case trimmer somewhat slower on pistol cases than on rifle cases but it will produce a very uniform case length with consequent perfection in crimping.
